EDUCATION

National University – Mall of Asia ***Pasay City, Philippines***

BS in Information Technology (Specialization in Mobile & Web Applications) *Expected Graduation: August 2027*

SM Foundation Scholar GWA: 3.77/4.00

EXPERIENCE

Lead Programmer (Full Stack) *2025 – Present*

Ctrl+ Freaks | JavaScript, React, React Native, Node.js, Express, Firebase, Git, Figma

- Spearheaded multi-developer project operations using Git/GitHub version control pipelines, driving consistent code modularity and efficient agile sprint cycles. Structured reusable frontend component architecture to accelerate cross-platform feature deployment.
- Created a reusable UI component library in Figma and code, streamlining visual consistency across cross-platform features.
- Architected end-to-end RESTful API endpoints and real-time backend synchronization using Node.js, Express, and Firebase.

Operations & Marketing Strategy Lead *2025*

Calle 971 Venture | Workflow Modeling, Product Strategy, Market Analysis

- Formulated product launch strategies and operational workflow models for commercial market execution, optimizing team task allocation and cross-functional coordination.
- Developed visual marketing strategies, product presentation frameworks, and launch materials to support brand rollout.

Client Service & Support Trainee *2024*

SM Stationery | Client Relations, Communication, Operations

- Executed front-line client service operations in a high-volume retail setting, addressing user inquiries and demonstrating rapid problem resolution under strict operational timelines.

PROJECTS

TAILS (MBY Pet Rescue and Sanctuary) *2026*

Lead Programmer & UI/UX Lead | React, React Native, Node.js, Express, Firebase, Groq API (LLM/NLP), Figma, Canva, Tailwind CSS

- Led and developed an AI-driven animal welfare system for MBY Pet Rescue and Sanctuary, deploying dual web application using React, Node.js, and Express.
- Designed complete high-fidelity wireframes, visual branding, and cohesive design systems in Figma for web platform.
- Optimized accessibility, color hierarchy, and navigation flows to enhance user engagement for over a hundred external users during UAT testing.
- Created graphic assets and promotional interface layouts tailored for shelter animal presentation and adopter matching workflows.

Bulldogs eXchange — Interactive 3D Game *2026*

Game UI/UX & Visual Designer | Unity, Figma, Visual Asset Integration

- Designed custom game UI/UX assets, heads-up display (HUD) components, and dynamic menu layouts in Figma.
- Developed interactive visual storytelling flows and environmental UI elements to improve player immersion and usability.
- Structured visual state management and asset pipelines within Unity for consistent graphic rendering

Sonic Prime Bank ATM Project *2023 – 2024*

Lead Developer | Java, NetBeans, MySQL / Local DB, Swing GUI

- Built a desktop management system featuring responsive Swing GUI components and backend transaction logic for library record tracking and automated banking operations.

SKILLS

UI/UX & Visual Design: Figma (Wireframing, Prototyping, Design Systems), User Interface Layout, Asset Pipeline Design, Branding

Multimedia & Digital Media: CapCut, Canva, Interactive Storytelling, 2D/3D Asset Integration

Game & Interactive Tools: Unity (UI Layouts, HUD Design, Visual Mechanics)

Frontend Design & Code: HTML5, CSS3, Tailwind CSS, JavaScript, React, React Native

Workflow & Tools: Git, GitHub, VS Code, Agile Sprint Planning
